

DFM ReCHARGED Weekly Updates
12/19/14

We wanted to let you know that there has been a change in membership on the DFMCH ReCHARGED* Steering Group. Deb Lovik-Kuhlemeier announced that she is leaving her position at UW Health including the DFM Strategic Planning Steering Group. We wish her well in Arizona. Will Katz, Clinic Manager at Odana Atrium, accepted the invitation to join the Steering Group. We value Will's experience in healthcare administration and management. He is already a strong addition to the team!

The Steering Group is busy developing questions for the data gathering phase of this process around Mission, Vision and Operations.

Mission: Focused on the now.

This says to the world:

Who are we?

What do we do?

How are we different from other departments?

Vision: Looking toward the future (2-5 years)

What should we be doing?

Are there things we are doing now that we shouldn't be?

What should we be looking at?

Where are we headed?

Operations:

How do we increase engagement and trust within the department?

Look for more to come in the New Year!
