

# DFM Multipoint Limits

By default, all Polycom Video Conferencing systems statewide will do a one-to-one video connection. With the purchase and installation of a special software code, Multipoint Software, the Polycom Video Conferencing systems can connect to either three or four remotes sites at a time.

Currently, only the Alumni Hall Polycom Video Conferencing systems have Multipoint Software installed:

- Mendota Room: Connect up to four remote sites
- Monona Room: Connect up to three remote sites
- Wisconsin Room: Connect up to three remote sites

All other Polycom Video Conferencing systems in the state can only connect on a one-to-one basis.

If you have a need to connect to more sites than your Polycom Video Conferencing system can handle by default, you may use the Video Conferencing Bridging service provided by the Pyle Center on the UW Madison Campus.
