

New and Improved Calculator

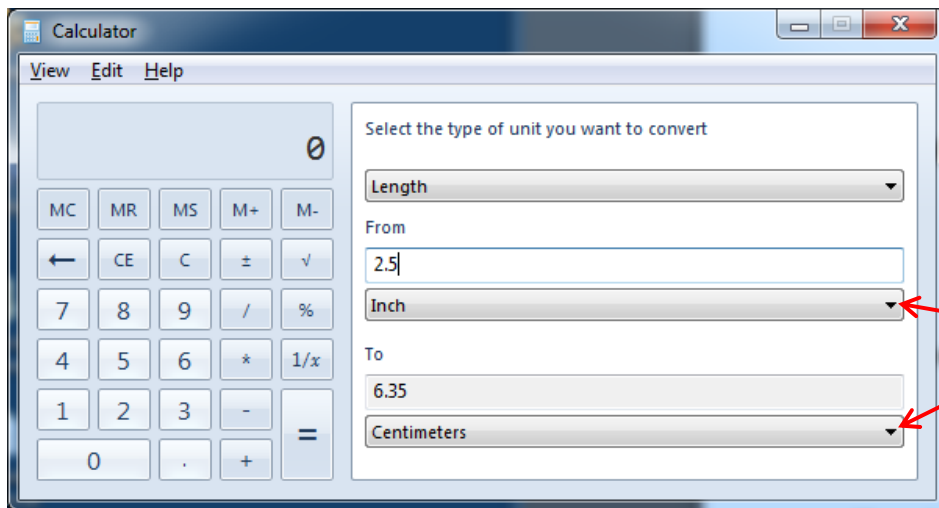

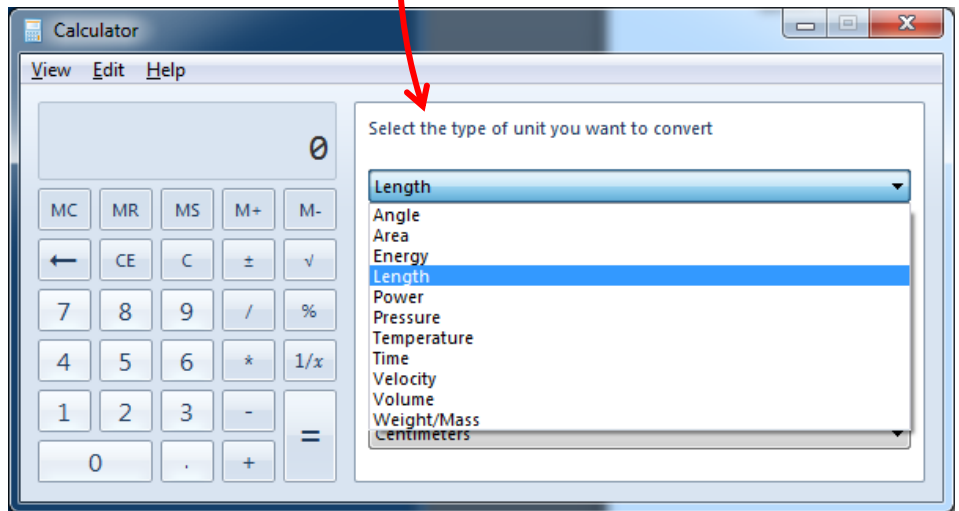

The reliable Calculator applet has been beefed up to do more than just basic arithmetic. Click the View pull-down menu and you can now toggle between Standard, Scientific, Programmer, and even Statistics modes.

There are a lot more features available now by selecting some options

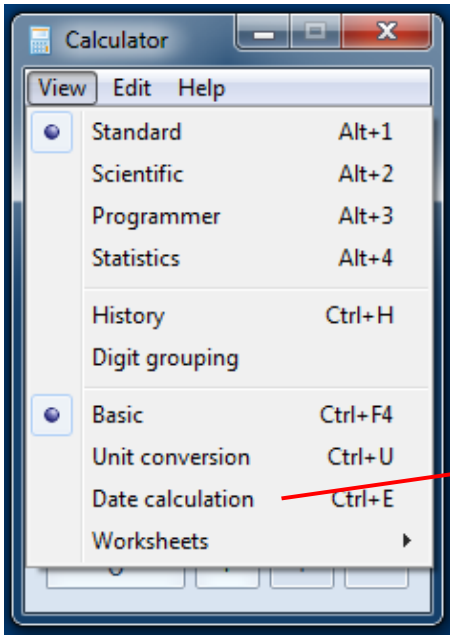

For example, Unit Conversion - select the type of unit you want to convert from this drop down list

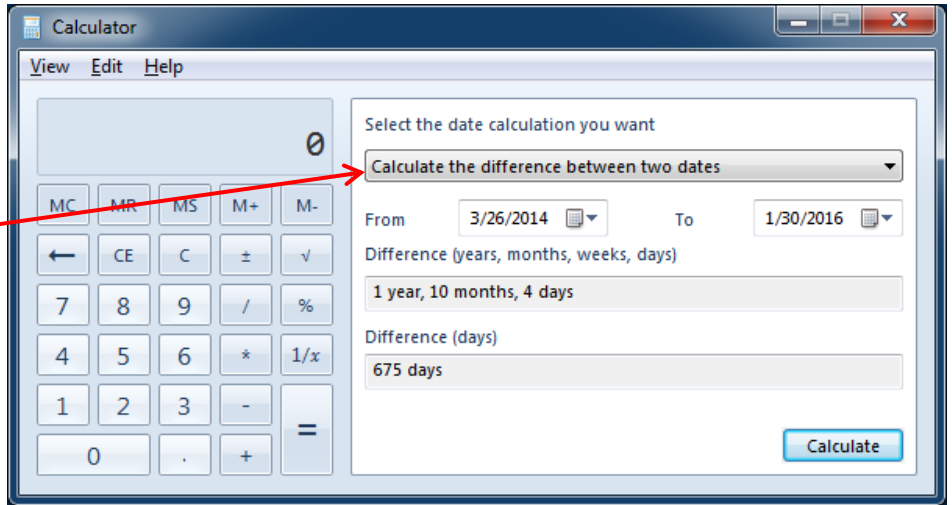

Choose your variables from these drop down lists

In this example, I wanted to know how many centimeters equals 2.5 inches

Date calculation is helpful when calculating the difference between two dates

Worksheets offer more options such as calculating your monthly Mortgage payment, a car loan, or your fuel economy
