

## Improved taskbar and full-screen previews

You can use the taskbar at the bottom of your screen to switch between open programs. The icons are larger, too. If you point to an icon, you'll see a small, preview version of the page or program. If you have more than one document open, you'll see small, preview versions of each document. If you point to this preview, you'll see a full-screen preview. To open a program or file, click an icon or one of the previews.

In Windows 7 you can set the order of the taskbar icons and they'll stay in that order. Let's say you want to move the icon with the Question Mark to the end of the taskbar - after Word.

Click on the Question Mark icon drag it to a new location on the taskbar.
